

Top 100 Companies – Full Recruitment Process Coverage

MERN MASTERY · 1 CR PRODUCT PREP · HARSH VARDHAN GUPTA

 **Study window:** 30 Jan 2027 – 14 Feb 2027 (Days 167-182)

 **Your slots (IST):** Mon-Fri **7:30-8:30pm & 9:00-10:00pm** · Sat-Sun **9:00am-12:00pm, 3:00-5:30pm, 6:00-8:30pm**

 **Calendar reminders:** harsh.gupta@getreelax.com – import <calendar/mern-mastery-study.ics>

Purpose: Every stage those companies use in hiring is in this roadmap. You do **not** need 100 separate syllabi — they reuse **12 process families**. Look up the company → run that family's stages → each stage has a drill below.

Processes change. Recheck the recruiter email the week you apply. The *types* of rounds do not change.

1. The 16 stages that exist in the wild

Every top-100 process is a **subset** of these. If you can pass all 16, you can pass any company's loop.

#	Stage	Who uses it	What they do	Drill in this roadmap
S1	Resume / LinkedIn / referral	All 100	Human or ATS screen	Phase 8A + PDF #21 §9
S2	Recruiter / HR screen (20–30 min)	All 100	Why us, notice, CTC, role fit	§4.1 this file
S3	Online Assessment (HackerRank / CodeSignal / Codility / HackerEarth / Amazon OA)	Amazon, Uber, MS, Adobe, Flipkart, banks, many unicorns	2–4 timed DSA, sometimes MCQ	PDF #21 §3 + §4.2
S4	Work-style / LP survey	Amazon (always), some Walmart	Situational judgment	§4.3
S5	Karat / Interviewing.io / third-party screen	Atlassian, some Uber/Airbnb	Live DSA or API design with a contractor	§4.4
S6	Phone / CoderPad DSA (1–2 problems)	Google, Meta, Apple, LinkedIn	Human-proctored coding	Phase 6 + 8B
S7	Domain deep dive (JS / React / Node / SQL)	Adobe, Salesforce, Atlassian FE, Freshworks	Verbal + tiny code	Tiers 1–2 + PDF #21 §4–7
S8	Take-home (24–72 h)	Postman, some startups, a few Uber teams	Repo + README + tests	PDF #20 §9 + §4.5
S9	Pair programming	GitLab, some Stripe/Shopify	Drive/navigate live	PDF #20 §9 + §4.6
S10	Backend machine coding (60–90 min)	Flipkart, PhonePe, Swiggy, Amazon, Razorpay	Working system	Phase 6G + PDF #15
S11	Frontend machine coding (60–90 min)	Atlassian, Uber, Razorpay, Swiggy FE	Working widget + a11y	Phase 6G/7G + PDF #15 §13 + #21 §6
S12	LLD / OOD (45–60 min)	Amazon, Microsoft, Adobe, Uber	Classes + extensibility	Phase 6B/6D + PDF #9

S13	Product HLD (45–60 min)	Google L5, Meta, Uber, Adobe, Flipkart SDE2+	Product RADIO	Phase 7 + PDF #10 + #20 §5
S14	CS fundamentals	Microsoft, Amazon, Adobe, Goldman, JPMC	OS / DBMS / Networks	PDF #20 §7 + #21 §4
S15	Behavioral / LPs / values / Googlyness / Bar raiser	All; Amazon heaviest	STAR + company values	PDF #16 + #20 §8 + §4.7
S16	Hiring manager + team match + offer + BGV	All who give offers	Scope, level, money, paperwork	§4.8–4.10 + PDF #17 Tier 5

Rule: When a recruiter sends the loop plan, highlight the S-numbers above and only polish those. Do not invent extra study.

2. Twelve process families (memorize these)

F1 – Google-like

S1 → S2 → S6 (phone DSA) → loop: S6×2–3 + S15 (Googlyness) [+ S13 if L5] → S16 team match → hiring committee → offer

Companies: Google, YouTube, DeepMind-adjacent SWE, some Apple IC.

Skip: OA for most experienced SWE (campus/new-grad may have OA).

Prep: unseen mediums + follow-ups. No memorized tagged-only list.

F2 – Meta-like

S1 → S2 → S6 (2 mediums / 45 min) → loop: S6×2 + S13 + S15 → S16 team match → offer

Companies: Meta, Instagram, WhatsApp, some Reality Labs.

Prep: Meta-tagged speed + feed/chat/typeahead HLD + impact stories.

F3 – Amazon-like

S1 → S2 → S3 + S4 → loop: S6 + S12 + S15×2 including ****bar raiser**** → S16

Companies: Amazon, AWS, Audible, Prime Video, Amazon India, some Walmart Global Tech.

Prep: OA week + LPs in *every* round + LLD (locker, rate limiter).

F4 – Microsoft-like

S1 → S2 → S3 or S6 → loop: S6×2 + (S12 or S13) + S14 sneak + S16 HM → as-appropriate
→ offer

Companies: Microsoft, LinkedIn, GitHub, some Xbox.

Prep: clean compilable DSA + CS pack + practical design.

F5 – Uber / marketplace-like

S1 → S2 → S3 (CodeSignal) → S6 → loop: S6 + S13 (maps/dispatch) [+ S11 on FE] → S16

Companies: Uber, Lyft, DoorDash, Ola, Swiggy (delivery), Zepto, Blinkit.

Prep: graphs, heaps, intervals + geospatial HLD.

F6 – Atlassian / collaboration-like

S1 → S2 → S5 (Karat) or S6 → loop: S11 or S10 + S7 + S15 values → S16

Companies: Atlassian, Slack, Notion-like, Zoom (sometimes), Monday-like SaaS.

Prep: frontend MC + ally + values stories.

F7 – Indian product / unicorn

S1 → S2 → S3 (HackerRank/HackerEarth) → S10 (90 min) → S6 → S13 → S16 HM

Companies: Flipkart, Myntra, PhonePe, Razorpay, CRED, Groww, Meesho, Dream11, ShareChat, Freshworks (hybrid).

Prep: machine coding is the filter. HLD is SDE2+.

F8 – Enterprise SaaS

S1 → S2 → S3 → S7 (JS/Java) + S6 → S13 + S16 HM

Companies: Adobe, Salesforce, Oracle, SAP, ServiceNow, Workday, Intuit, Sprinklr, Freshworks, Zoho (Zoho is more take-home/HM).

Prep: production JS + one product HLD + less “Google hard.”

F9 – Payments / fintech

S1 → S2 → S3 → S6 + S13 (payments, idempotency) + S7 SQL + S16

Companies: Stripe, PayPal, Block, Visa, Mastercard, Amex, PhonePe, Razorpay, Paytm, Pine-like, Juspay-like.

Prep: payment HLD (PDF #10) + Ticketmaster locks + SQL.

F10 – Consumer / media / ads

S1 → S2 → S6 → S13 (feed, video, ads) + S15 → S16

Companies: Netflix, Spotify, Pinterest, Snap, Reddit, X, ByteDance, InMobi, ShareChat.

Prep: YouTube/feed HLD + ranking talk at a high level.

F11 – Infra / data / security (MERN is a stretch)

S1 → S2 → S3/S6 → S6 hard + S13 infra + often Java/Go/C++

Companies: Databricks, Snowflake, Confluent, Datadog, Cloudflare, CrowdStrike, Palo Alto, Nutanix, Rubrik, Elastic, HashiCorp, NVIDIA, Intel, Qualcomm, Cisco.

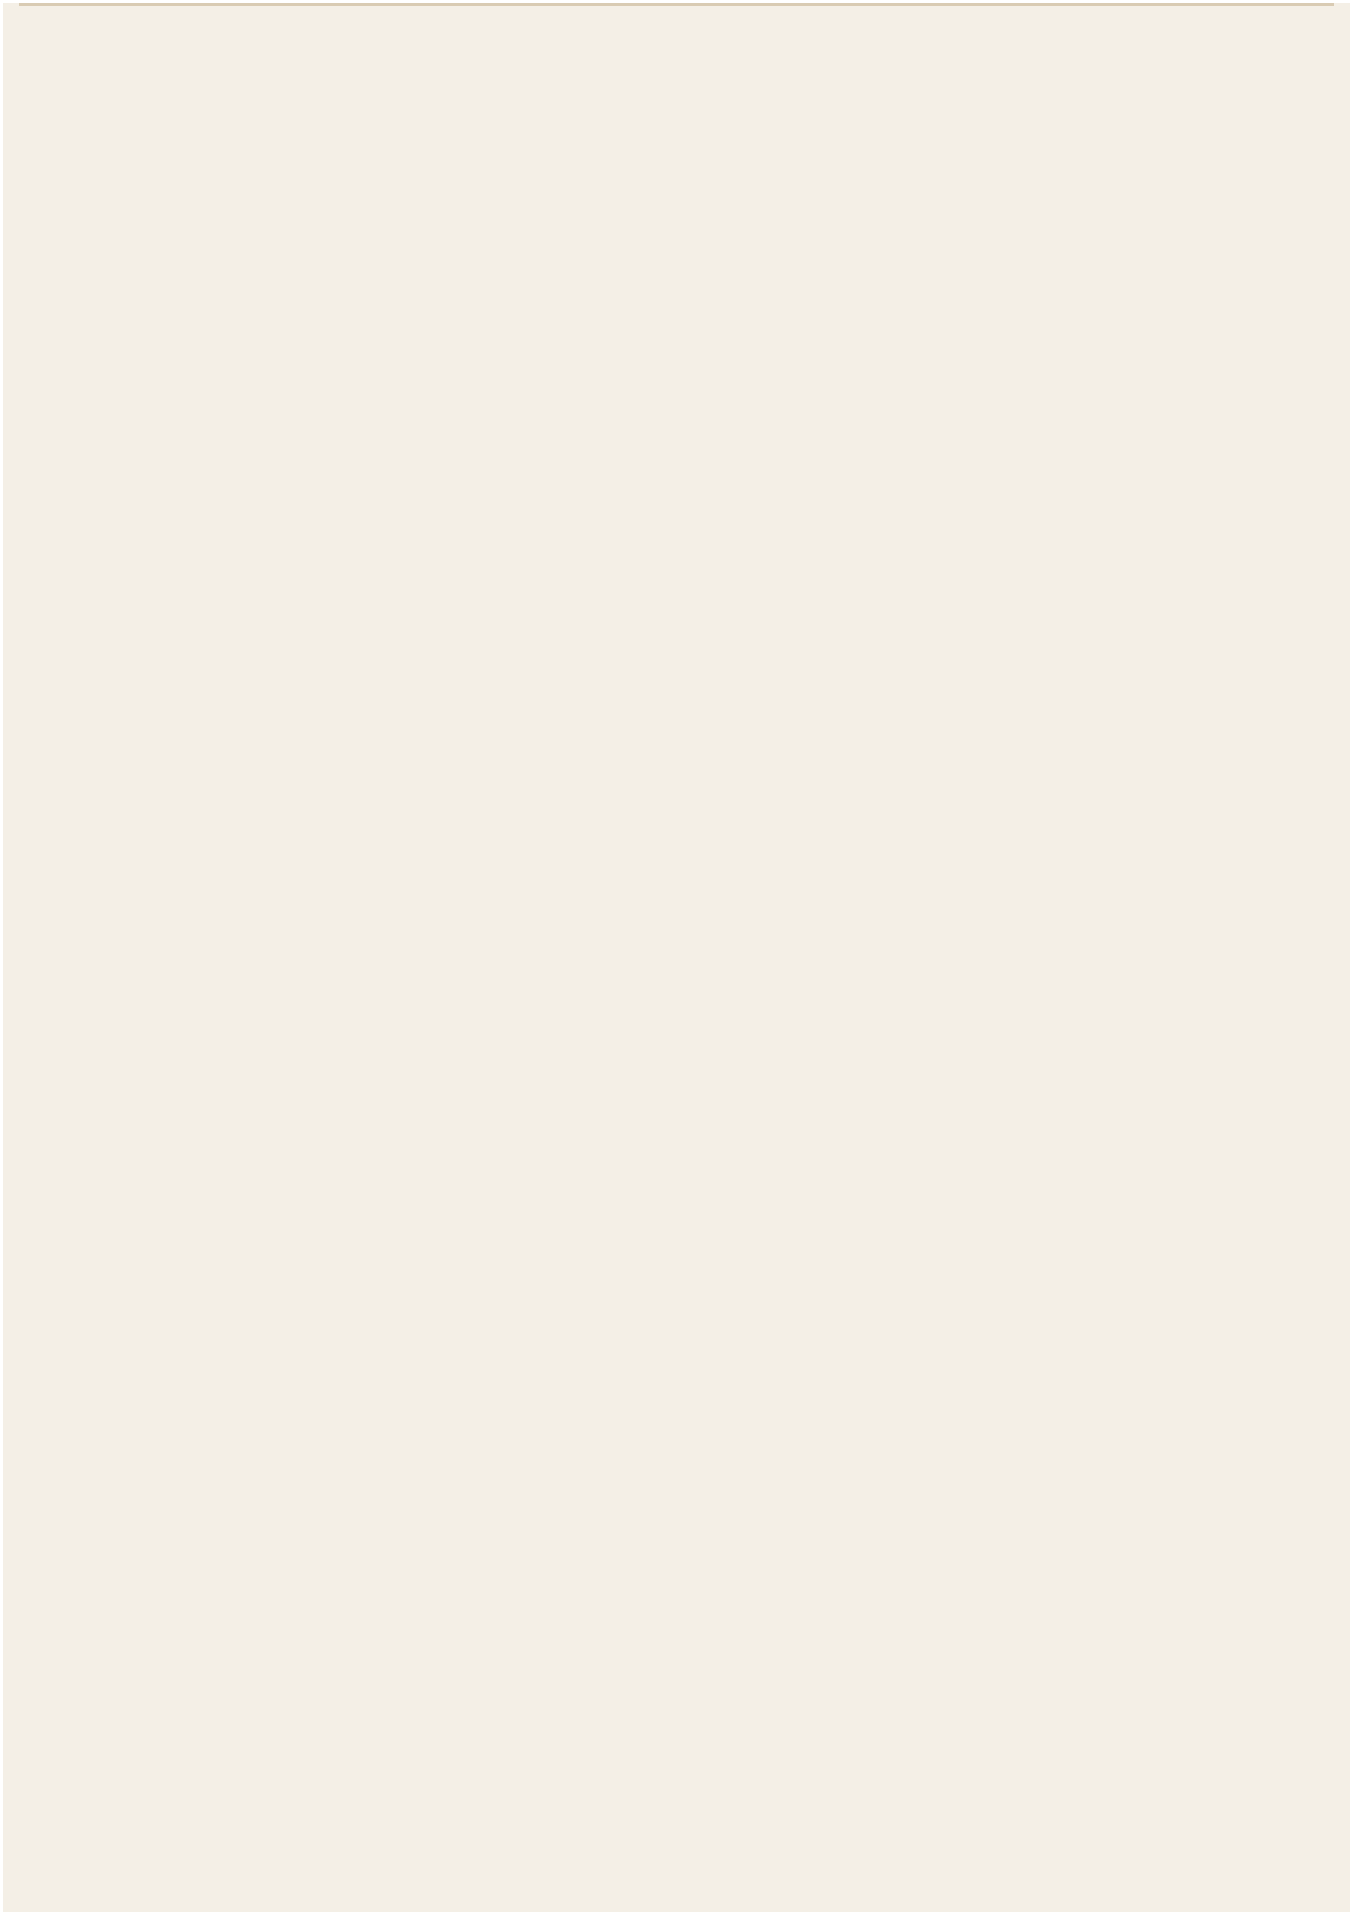

Honest: apply only if the *role* is fullstack/UI. Do not rebuild the syllabus for compiler jobs.

F12 – Banks / trading-tech / take-home startups

Banks: S1 → S2 → S3 → S6 + S14 + S15 → S16

Startups / tools: S1 → S2 → S8 or S9 → S16 HM

Companies: Goldman, JPMC, Morgan Stanley, Bloomberg, Capital One, DE Shaw (more DSA), Postman, BrowserStack, GitLab, Shopify (often pair), Coinbase.

3. Top 100 companies → family (look up, then drill those S-

stages)

#	Company	Family	India hire?	MERN / fullstack fit	Extra note
1	Google	F1	Yes	FE / fullstack yes; core BE mixed	Team match after hire
2	Meta	F2	Yes	Strong FE/fullstack	2 mediums speed
3	Amazon	F3	Yes	Fullstack + LLD	Bar raiser + OA
4	Apple	F1-ish	Limited	FE possible	Domain + secrecy
5	Netflix	F10	Rare IN	Senior culture	Keeper test / high bar
6	Microsoft	F4	Yes	Yes	CS sneak
7	Uber	F5	Yes	Yes	CodeSignal + maps HLD
8	Airbnb	F2/F5	Rare IN	Yes	Product sense
9	Stripe	F9	Rare IN	Yes	Payments HLD
10	LinkedIn	F4	Yes	Yes	Microsoft-like
11	Adobe	F8	Yes	Yes	JS + HLD
12	Salesforce	F8	Yes	Yes	Multi-tenant talk
13	Atlassian	F6	Yes	Strong FE	Karat + values
14	Oracle	F8	Yes	Mixed	OA + Java often
15	SAP	F8	Yes	Mixed	Enterprise
16	Intuit	F8	Yes	Yes	Product + tax domain
17	ServiceNow	F8	Yes	Yes	SaaS HLD
18	Workday	F8	Some	Mixed	
19	Snowflake	F11	Some	Only UI roles	

20	Databricks	F11	Some	Only UI roles	
21	Palantir	F1-ish	Rare	Hard DSA	
22	Shopify	F12	Rare	Yes	Pair + product
23	Block (Square)	F9	Rare	Yes	Payments
24	PayPal	F9	Yes	Yes	
25	eBay	F8/F10	Some	Yes	Marketplace HLD
26	Booking.com	F5/F10	Some	Yes	
27	Expedia	F8	Some	Yes	
28	Spotify	F10	Rare	Yes	
29	Dropbox	F1/F10	Rare	Yes	Drive HLD
30	Slack	F6	Via Salesforce	Yes	
31	Zoom	F6/F8	Some	Yes	
32	Pinterest	F10	Rare	Yes	Feed
33	Snap	F10	Rare	Yes	
34	X (Twitter)	F10	Rare	Yes	Feed HLD
35	Reddit	F10	Rare	Yes	
36	Coinbase	F9/F12	Rare	Yes	
37	DoorDash	F5	Rare	Yes	
38	Lyft	F5	Rare	Yes	
39	ByteDance / TikTok	F10	Some	Yes	Speed + HLD
40	NVIDIA	F11	Yes	Only if UI	Else CUDA – skip
41	Intel	F11	Yes	UI only	
42	Qualcomm	F11	Yes	UI only	
43	Cisco	F8/F11	Yes	Mixed	

44	VMware / Broadcom	F11	Yes	Mixed	
45	IBM	F8	Yes	Mixed	
46	Tesla	F1-ish	Rare	Mixed	
47	Walmart Global Tech	F3-ish	Yes	Yes	OA + LLD
48	JP Morgan	F12	Yes	Yes	OA + CS
49	Goldman Sachs	F12	Yes	Yes	Superday
50	Morgan Stanley	F12	Yes	Yes	
51	Bloomberg	F12	Some	Yes	Terminal + DSA
52	Visa	F9	Yes	Yes	Payments
53	Mastercard	F9	Yes	Yes	
54	American Express	F9	Yes	Yes	
55	Capital One	F12	Rare	Yes	
56	D.E. Shaw	F12	Yes	DSA-heavy	JS ok if they allow
57	ThoughtSpot	F8	Yes	Yes	
58	Sprinklr	F8	Yes	Yes	
59	Nutanix	F11	Yes	UI only	
60	Rubrik	F11	Yes	UI only	
61	CrowdStrike	F11	Some	UI only	
62	Palo Alto Networks	F11	Yes	UI only	
63	Okta	F8	Some	Yes	Auth domain
64	MongoDB	F8	Some	Yes	
65	Elastic	F11	Some	UI	
66	HashiCorp	F11	Rare	UI	
67	GitHub	F4	Some	Yes	

68	GitLab	F12	Remote	Yes	Pair + values
69	Cloudflare	F11	Rare	UI	
70	Datadog	F11	Rare	UI	
71	Confluent	F11	Some	UI	Kafka as <i>product</i>
72	Twilio	F8	Some	Yes	
73	Freshworks	F7/F8	Yes	Yes	
74	Zoho	F8/F12	Yes	Yes	Often take-home
75	Postman	F12	Yes	Yes	Take-home API
76	BrowserStack	F12	Yes	Yes	
77	Flipkart	F7	Yes	Yes	90-min MC
78	Myntra	F7	Yes	Yes	
79	Swiggy	F5/F7	Yes	Yes	MC + marketplace
80	Zomato	F7	Yes	Yes	
81	PhonePe	F7/F9	Yes	Yes	MC + payments
82	Razorpay	F7/F9	Yes	Yes	FE MC + payments
83	Paytm	F7/F9	Yes	Yes	
84	CRED	F7	Yes	Yes	
85	Groww	F7/F9	Yes	Yes	
86	Zerodha	F12	Yes	Yes	Small team / HM
87	Meesho	F7	Yes	Yes	
88	Ola	F5	Yes	Yes	
89	MakeMyTrip	F7	Yes	Yes	
90	Policybazaar	F7	Yes	Yes	
91	Dream11	F7	Yes	Yes	

92	Games24x7	F7	Yes	Yes	
93	InMobi	F10	Yes	Yes	Ads HLD
94	Urban Company	F7	Yes	Yes	Marketplace
95	Zepto	F5/F7	Yes	Yes	
96	Blinkit	F5/F7	Yes	Yes	
97	ShareChat / Moj	F7/F10	Yes	Yes	Feed
98	Innovaccer	F8	Yes	Yes	
99	Udaan	F7	Yes	Yes	
100	Delhivery	F7	Yes	Yes	Logistics HLD

If a company is not in this 100: pick the closest family (SaaS → F8, payments → F9, grocery/delivery → F5, Indian app → F7).

4. Stage scripts that were missing (do these)

4.1 Recruiter screen (S2) – 20 min – all 100

They are not testing DSA. They are testing level, logistics, and whether you waste a loop.

Script:

1. 60-sec “tell me about yourself” (PDF #16) — current work → TaskFlow/ShopLite metric → why this company.
2. Notice period / serving / buyout — one sentence, no drama.
3. Comp: “I’m targeting market for [L4/SDE2] in India, around X–Y L TC. Happy to talk after the loop.” Do not dump current CTC first.
4. Role: fullstack / FE / Node — confirm stack. If they say Java-only, walk away (PDF #21).
5. Ask: team, loop shape (write down S-numbers), location, hybrid.

Drill (Day 170): record a 20-min mock with a friend as recruiter. No code.

4.2 OA platforms (S3) – extras beyond PDF #21

Platform	Quirk	Practice
HackerRank	Hidden tests; <code>stdin</code>	HR editor only, 70 min
CodeSignal	Score /850; 4 Qs	Arcade + one certified
Codility	Correctness + performance	Worst-case complexity or you get 50%
HackerEarth	Common in Indian unicorns	Same as HR
Amazon OA	2 DSA + work sim	PDF #21 + §4.3

Codility extra: after your solution, state complexity in a comment. They auto-fail $O(n^2)$ on $n=1e5$.

4.3 Amazon work-style survey (S4)

16 Leadership Principles. Pick the **customer** / **ownership** / **dive-deep** option, not the “wait for manager” option. Be consistent across questions (don’t be hero on one and passive on the next).

Drill: read Amazon LP one-liners (PDF #16). 20 min. Do not overthink.

4.4 Karat / third-party (S5)

- 60–75 min, often **API design** + **light coding** or 1–2 DSA.
- Interviewer is a contractor — they follow a rubric. Speak more than in a Google round.
- Atlassian: expect autocomplete-like API (`GET /suggest?q=`) + complexity.

Drill (Day 173 extra): 45 min — design autocomplete API aloud, then code the in-memory trie. Same as FE MC without React.

4.5 Take-home (S8)

Time-box **6–8 hours**. README: assumptions, how to run, tradeoffs, what you would do next. Tests on the core rule. No extra framework for show.

Drill: one weekend in Phase 9 or Day 171 — extract ShopLite checkout into a tiny repo with README + 3 tests.

4.6 Pair programming (S9)

You drive. Narrate. Ask before a big rename. Tiny steps. If stuck 3 min, say the brute force.

Drill: 45 min with a friend on LC 56 — they may only ask questions.

4.7 Bar raiser (S15 Amazon)

A trained interviewer from **another team**. They can veto. They push on **one LP** until the story has numbers. Prepare 2 stories with metrics you can defend for 15 min.

Drill (Day 177): one story, 15 min of “what was *your* decision?” follow-ups.

4.8 Hiring manager (S16)

Questions: why this team, hardest bug, underperforming peer, 2-year plan, system you would rewrite.

Level signal: talk scope (users, latency, who you influenced), not tasks.

Drill: Day 180 (already in Phase 8D).

4.9 Team match (Google / Meta)

After “hire,” you talk to 2–4 teams. This is **not** another DSA. It is: what the team owns, on-call, stack, how you would ramp.

Ask: what failed last quarter, what the new hire owns in 90 days, FE vs BE split.

Fail: only talking compensation, or saying you refuse on-call.

Drill (Day 181): 10-min pitch: “I want a product fullstack team on a user-facing surface (feed, checkout, or collab).”

4.10 Hiring committee, offer, BGV

- **HC (Google):** packet of notes. You cannot “study” this. You already did — every round’s notes must show hire.
- **Offer:** PDF #17 Tier 5 + PDF #21 §8 (1 Cr is TC, not year-1 cash).
- **BGV:** dates on resume must match. Do not inflate title. Notice-period letter ready.

5. Phase 8 – run every stage once (so no process is theoretical)

Day	Stage IDs	What you do
169	S3	OA: 2 mediums in HackerRank editor (PDF #21)
170	S1 + S2	Resume + recorded recruiter screen
171	S3 + S8 lite	CodeSignal-style set or take-home README on ShopLite
172	S6	Phone DSA
173	S5 or S12	Karat-style API+code or LLD
174	S13	Easy product HLD
175	S6 + S13	Combined
176	S10 or S11	MC
177	S15 + S4	STAR + Amazon LP / bar-raiser push
178	F1/F2 loop	Google/Meta shape
179	F3/F6/F7 loop	Amazon / Atlassian / Flipkart shape
180	S16	HM + weakest redo
181	S1 + S9-team	Apply 8 + team-match pitch
182	S16 offer	Comp script

That is the **complete process set**. Company 47 and company 82 do not add a 17th stage — they pick from S1–S16.

6. How to use this the week a recruiter emails

1. Find the company in §3 → note **family**.
2. Recruiter confirms rounds → map to **S-numbers** in §1.
3. Spend 48 hours only on those S-drills.

4. If family is **F11** and the JD is C++/Java systems — decline; stay on MERN targets.
5. After the loop, log which S you failed. That is your Phase 9 focus.

7. Coverage guarantee (what “complete” means)

Claim	Meaning
All 100 listed	Mapped to a family + notes
All families	F1-F12 cover FAANG, SaaS, Indian product, payments, banks, startups, infra
All stages	S1-S16 each have a drill in this file or PDFs #15-21
Not claimed	Live JD text for 100 companies (it changes quarterly)
Not claimed	Quant / hardware / compiler roles (out of MERN 1 Cr path)

Next: Phase 8 days 169–182. When you pick a target list of 8, write their families on paper first.
